Biography

Audioelectronic is the alter ego of Portland-based producer and live performer Gustavo Lanzas. Originating from the San Francisco Bay Area, Gustavo has been writing and performing electronic music since 1990. A veteran producer with a deep knowledge of the dance-floor classics, Gustavo connects the roots of electronic dance music to the sound of today.

With Nude Photo Music, Gustavo has established himself as a key member of the North West's emerging electronic music scene. Frequent collaborations with Portland's SubSensory Recordings and Atlanta's Steamtown Records connect Nude Photo Music to a new generation of quality dance music labels. Remixes from John Selway, The Beat Broker, Brun Brown of Swayzak, Dave Aju, Mario Marotto, and releases from the growing roster of artists have garnered strong support from major players in the global dance music scene.

As a live performer or DJ, Gustavo has shared the stage with many electronic music luminaries – Disco D, Twerk, Sutekh, Kit Clayton, Soul Oddity, Legowelt, Ed DMX, Adult, Phil Stumpf, Ark, Dave Aju, Alan Oldham, Plaid, Broker / Dealer, TLR, Cosmic Force, John Selway, Adam X, Mixmaster Morris, Alex Patterson, and more.

Originally from San Francisco's explosive early 90's rave scene, Gustavo began performing live electronic music as part of Protolab. Later, venturing into Jungle / Drum & Bass, Protolab is widely credited as the first Bay Area Jungle live PA. In the late 90's, after organizing some of the first all-electro underground parties in San Francisco, Gustavo teamed up with Jim Gourgoutis, and launched Cybrid. And with releases on Belief Systems and Exact Science, Cybrid established themselves on the vanguard of the electro scene, defining what would become the sound of the San Francisco underground at that time.

In the early 00's – residencies at long-running techno/electro club Impulse and at seminal SF techno/electro night :Code at the DNA Lounge quickly followed. Gustavo became a regular DJ at numerous other clubs and parties in San Francisco, including Minimal Mondays, Scatter, Drum Machine Museum, Tokyo Electric, Club Activ, at venues such as 1015 Folsom, Polo's Blue Cube, Hush Hush, Hi Fi Lounge, Luna Lounge, and RX Gallery.

His production skills have provided production/engineering assistance to artists on Sunburn, Spectral, Traum, SubSensory, Steamtown, and Sentrall. Gustavo has also worked or provided music technology consulting services to Apple Computer, Opcode Systems, Digidesign, Akai, and Yamaha.
